Product Information and brochures are available on our website www.hvacshop.net. Lead time on Hail/Coil Guards is 4-6 weeks. 5 Year Warranty

-Please select from the following additional quoting options-

Factory installation for Hail/Coil Guard project (must be scheduled 2 weeks in advance).

Comments/Notes/Special Instructions:

Defender™ Condenser Coil Guards Manufactured from .081 Aluminum, Installed with gasketed stainless steel screws. Coil/Hail Guards will never oxidize and will protect the condenser coils from extreme weather conditions.

Defender™ protects the units condenser coil from damage due to extreme weather conditions such as hail and flying debris in high wind conditions.

Damaged condenser coils restrict adequate air-flow needed to rapidly dissipate heat, this may cause increased and above normal operating temperatures for the unit compressors.

Coil/Hail Guards protect the lifespan of your rooftop unit, reduce overall maintenance costs, and keeps your equipment operating at maximum efficiency.
